

FABULOUS FUNGI!

May 13 – Classroom workshop

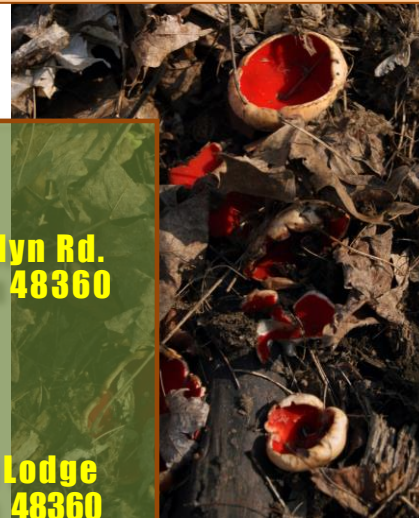

- What to look for when identifying Spring mushrooms.
- Where to look for mushrooms; learn about fungus and their special relationships within ecosystems.
- Why these “special fruits” are vital to people and the environment.
- When to find a variety of species...Spring hosts more than morels!

The classroom workshop is located within Orion Parks' Orion Center. In addition to learning the “4 W's”, participants will observe dried and fresh specimens and learn how to “spore print”.

May 23 – Field Experience (Foray)

In tandem with the May 13th Classroom Workshop, the field experience is a foray throughout Camp Agawam; searching for and identifying Spring mushrooms.
